Unlock the Secrets to True Financial Sovereignty

In this book, you'll discover what it truly means to be a **Secured Creditor**—empowered, protected, and in control of your financial destiny. For a comprehensive understanding of operating on the private side, I highly recommend reading *Be Bulletproof as a Secured Creditor*. This powerful resource provides indispensable insights that will deepen your grasp of these transformative concepts.

Within these pages, I delve into the crucial role of a **Foreign Grantor Trust** and why it's essential for safeguarding your assets and preserving your financial standing. I've also included the introduction from *Be Bulletproof* to offer you a broader perspective and a solid foundation for your journey to financial freedom.

🔥 Are you tired of living in fear of losing your hard-earned assets—your home, vehicles, precious metals, or even custody of your children?

🔥 Is your high tax burden suffocating your ability to thrive, create, and expand your wealth?

🔥 Are legal battles, lawsuits, and the threat of asset seizures keeping you awake at night?

🔥 Are you entangled in overwhelming court issues like child support, liens, levies, or credit card debt?

🔥 Do you fear imprisonment for unpaid debts?

🔥 Would you like to protect your wealth in a secure, tax-exempt bank account?

🔥 Have you considered renouncing your U.S. citizenship to escape excessive taxation—hoping for a tax-free life abroad?

🔥 What if I told you that you don't need to renounce your citizenship to live freely? Once you change your status to the private side, a world of possibilities opens up—legally and powerfully.

This path has empowered me and **thousands of others** to break free from the financial chains of the system. It's time to take control of your destiny, protect your wealth, and live life on your terms.

We are here to serve those who refuse to be drained by oppressive financial systems—the ones who seek true freedom for their money, family, and future.

If you've been through endless legal battles, faced unyielding courts, and found no remedy in sight—then becoming a **Secured Creditor** and establishing a **Silver Bullet Foreign Trust** is your solution to lasting protection and peace of mind.

 **We Empower People Worldwide to Safeguard Their Assets and Valuables from Unlawful Seizure!**

Are you ready to reclaim your financial freedom?  

What is a Secured Creditor

The Path to True Freedom: Becoming a Secured Creditor

1. Freedom from the System:

A Secured Creditor operates on the **private side**—beyond the reach of oppressive restrictions and financial enslavement. Free from the control of corporate “plantation owners” and their systems, they stand as truly **independent sovereigns**.

2. Sovereignty Over Governance:

Secured Creditors recognize no human authority above their own. They conduct their business autonomously, empowered by their status to **discharge heavy debts** imposed by corporations and foreign agents.

3. Mastering the System:

We don't just tell you about freedom—we show you **step-by-step** how to achieve it and thrive as a Secured Creditor.

4. Eliminate Debt and Legal Burdens:

Imagine a life free from crushing debt, judgments, lawsuits, credit card balances, student loans, child support, and overwhelming taxes. As a Secured Creditor, you gain the power to **discharge these burdens** legally and effectively.

5. A Life Without Surveillance:

Ever wonder why the wealthy seem untouched by the system's penalties and taxes? It's because they've mastered the private side. As a Secured Creditor, you can too—**without renouncing your citizenship**. Imagine

living without constant surveillance, free from the financial shackles that bind the masses.

6. Collateral and Protection:

Any asset you own—be it **crypto, property, land, vehicles, gemstones, or yachts**—serves as collateral to protect your financial freedom. As a Secured Creditor, you have **first-order claim** on these assets, ensuring that they cannot be seized unlawfully.

7. Utilizing the Foreign Trust:

Your **Foreign Grantor Trust** becomes your fortress. It houses your birth certificate, driver's license, passport, assets, and even your bank accounts—transforming them into **powerful tools for discharging debt** and shielding wealth.

8. The Power of the Private Side:

Secured Creditors operate with a **foreign tax-exempt EIN** and a trust they control—turning the tables on a system designed to exploit. This strategic shift enables you to eliminate debts, taxes, and lawsuits tied to the all-caps **corporate franchise name** on your birth certificate.

9. Rejecting the Title of ‘Private Citizen’:

We never use the term ‘**Private Citizen**’—it’s a trap that pulls you back under their jurisdiction. Instead, we teach you to operate as the elites do, leveraging **UCC (Uniform Commercial Code)** strategies to reclaim your sovereignty.

10. The Spiritual Evolution of Freedom:

Have you ever wondered why we start life seemingly trapped on a financial plantation? Perhaps it’s a path of **spiritual evolution**—a journey from servitude to sovereignty, from slave mode to **elite mode**. By mastering this path, we evolve not only financially but spiritually, rising to a higher state of wisdom and balance.

11. The True Power Behind the Curtain:

The elites—the Rockefellers, the Rothschilds, the Vatican—have mastered hidden knowledge that keeps them in power. While many view them as evil, the true issue is the **knowledge gap**. As a Secured Creditor, you gain access to the same strategic knowledge—legally and ethically—without falling into the trap of victimhood.

12. For the Just and the Ready:

This path is not for everyone. It's for those who are **just, sincere, and ready** to reclaim their sovereignty—not those seeking to escape karmic debts or misuse this knowledge for selfish gains.

13. The Universe Is Watching:

Your ancestors and the universe itself observe your actions. If you attempt to misuse this knowledge with ill intent, **the backlash will be swift and severe**. Integrity is the foundation of true freedom.

14. The Hidden Truth of the United States:

The United States is not the country most think it is—it's a **corporation owned by the Crown**. Even the elites, including presidents, operate on the private side through their own UCCs and trusts. It's time you do the same.

Serving Those Who Seek True Freedom:

We empower people from around the world to **protect their assets and wealth** from unlawful seizures. If you're tired of being drained by the system and ready to step into **sovereignty and freedom**, becoming a Secured Creditor is your path forward.

Are you ready to break free from the plantation and reclaim your destiny?

The Benefit of Secured Creditors

The Hidden Power of Becoming a Secured Creditor

1. Reclaiming Control Over Your Assets:

Imagine a reality where **you**—not the state—hold the ultimate authority over your possessions, children, finances, properties, vehicles, and even your companies. As a **Secured Creditor**, you become the true **holder in due course** of your estate, protected by your **Foreign Trust**. This trust encompasses everything: your **birth certificate, passport, social**

security, licenses, assets, bank accounts, and businesses. Even your companies can benefit as **designated beneficiaries** of this trust.

2. The Awakening to Truth:

If you've ever felt that something is profoundly **wrong** with the world—that we are still on a **financial plantation** controlled by unseen slave masters—you're right. This awakening isn't just financial; it's a **spiritual call to freedom**. When you truly understand the reality of the system, you realize why you must break free.

3. Freedom from Debt and Control:

Becoming a Secured Creditor gives you the **legal power** to eliminate oppressive debts, judgments, taxes, and legal actions against you. No more being told what to do by employers, courts, or financial institutions that **monetize your name** without your consent.

4. The Power of Your Signature:

As a Secured Creditor, your **signature becomes golden**—a powerful tool to settle debts with **credit instead of debt notes**. Most people think of financial freedom as an illusion, but this knowledge exposes the truth: it's not about **AFV (Accepted for Value)** alone; it's about **transmuting your status** entirely to the private side.

5. Beyond the UCC—Mastering the Private Side:

Many believe that filing a **UCC (Uniform Commercial Code)** statement alone is enough. But true freedom requires a deeper transformation:

establishing a **Foreign Trust** to control your assets and EINs, and effectively **transmuting your social security number** into a tool of power rather than enslavement. This puts you entirely on the **private side**, shielded from unlawful monetization of your estate.

6. Diplomatic Immunity and Peaceful Sovereignty:

As a Secured Creditor, you gain **diplomatic status**—protected from unlawful detention, taxes, and court judgments. You operate as a **peaceful ambassador** on the private side, recognized by international agreements like **The Hague and Geneva Conventions**. This is true sovereignty—beyond mere words, it's actionable power.

7. The Real Story Behind HJR 192:

In 1933, **HJR 192** declared that paying debts with gold or silver was illegal, replacing them with **Federal Reserve Notes**—essentially **debt instruments**. The confiscation of gold and silver should have been a red flag to every American: the constitutional right to real money was replaced with **foreign paper currency**. Accepting this currency meant **agreeing to the rules of the plantation**—unbeknownst to most.

8. The Truth About ‘We the People’:

The phrase “**We the People**” in the Declaration of Independence didn't refer to the public—it referred to the **elites operating on the private side**: the Freemasons, the Secured Creditors. Most Americans were deceived into believing it applied to them, when in reality, they were placed on the public side, bound by **corporate law and perpetual debt**.

9. The Illusion of Freedom:

From the inception of **USA Inc. in 1871**, America has been under **corporate martial law**—a truth concealed by layers of illusion, media manipulation, and false narratives. The real freedom lies in understanding this deception and reclaiming your status as a **Secured Creditor**.

10. A Spiritual and Financial Awakening:

This journey isn't just about financial liberation—it's a **spiritual evolution**. Recognizing the matrix we live in is the first step. The **illusion of freedom** keeps most people enslaved, believing what they see on the news or what they're taught about debt and money. The reality is, everything is a game—an elaborate school designed to **test your awakening**.

11. A Call to Rise Above:

If you're drawn to this path, it's because your spirit knows you were meant for **more than financial servitude**. You were meant to operate as an **elite**—but not the kind you've been taught to hate. As a Secured Creditor, you ascend to a higher level of **wisdom and responsibility**, free from the oppressive systems that bind the masses.

12. Embrace Your Sovereign Power:

Your **Foreign Trust** is your shield. Your **signature** is your sword. As a Secured Creditor, you reclaim your **rightful place as a sovereign**, above

any king or queen. The system knows this—that's why they work so hard to keep this knowledge hidden.

13. Breaking Free from the Plantation:

The plantation was never abolished; it was modernized. By understanding **HJR 192** and leveraging the **UCC and Foreign Trust**, you reclaim what was always yours: the right to live **free, sovereign, and powerful**.

So the question is: Are you ready to leave the plantation and reclaim your true estate? 🗝️ ✨

Security Agreement

printablelegaldoc.com

Sample

Security Agreement

_____, referred to herein as SECURED PARTY, and _____, referred to as DEBTOR, agree:

_____, DEBTOR, grants a security interest in the following property to _____, SECURED PARTY:

This security agreement is made to secure an indebtedness of _____ to _____, described as follows:

A _____, in the original principal amount of \$ _____ & ____/100 (Dollars) dated _____

This security interest is also given to secure any other debts which may be owed by _____ to _____ from time to time.

DEBTOR warrants to SECURED PARTY that the property in which a security interest is granted is subject to no other liens, charges or encumbrances and that there are no financing statements or other lien notices on file regarding debtor that might create a lien on the property secured herein.

DEBTOR shall maintain the collateral in good repair, ordinary wear and tear excepted, and shall insure the same for its full value. DEBTOR shall provide to secured party certificates of insurance. SECURED PARTY shall be named as a loss payee on a long term standard loss payable clause. Should DEBTOR fail to maintain such coverage, SECURED PARTY may obtain the same and DEBTOR shall pay SECURED PARTY for the same, together with interest at the highest legal rate on the amounts advanced by the SECURED PARTY.

Upon default, as is defined herein, SECURED PARTY shall have all of the rights given to a secured party under the Uniform Commercial Code, Article 9.

Default shall be defined as:

1. Any failure to comply with any covenant of the indebtedness secured by this agreement, including but not limited to a failure to timely pay as provided;
2. The entry of a judgment, tax lien or other charge against the DEBTOR which is not satisfied or superseded within thirty days of inception;
3. Such other commercially reasonable reason that leads SECURED PARTY to believe that its security is in peril.

DEBTOR shall execute any and all financing statements or other documents which are requested by SECURED PARTY and which SECURED PARTY determines is necessary to perfect SECURED PARTY'S LIEN.

DEBTOR appoints SECURED PARTY agent as its agent to file and any and all financing statements which may be necessary or required to perfect SECURED PARTY's security interest, and DEBTOR authorizes SECURED PARTY to execute the same for DEBTOR.

This document represents the entire agreement between the parties, and there are no agreements or representations which are not stated herein. This agreement may not be modified unless it is in writing and signed by both parties.

Dated: _____

For _____, SECURED PARTY:

The Core of Financial Sovereignty: Understanding Liens and Security Agreements

This is the essence—the true **power behind financial freedom** as a Secured Creditor. It's not just about filing a **UCC statement**; it's the **Security Agreement** that holds real authority. Let's break down why this is so crucial.

1. The Power of the Security Agreement:

If you're considering lending money, a **Security Agreement** is essential for safeguarding that loan. This agreement allows the borrower to offer **collateral**—a valuable asset that the lender can claim if the loan isn't repaid. For example, if I lend you **\$10,000**, we'd draft a Security Agreement naming your car as collateral. Should you fail to repay, I have the legal right to **seize the car** and file a **UCC lien**—publicly notifying everyone of my claim.

This is precisely how **financial institutions** operate. They have **UCC liens** on almost every individual—whether American, British, Mexican, or otherwise. If you engage in their commercial transactions—**banking, loans, credit cards**—and fail to repay, they can **lawfully pursue your assets** under the lien filed against the **all-caps name** on your **birth certificate bond**.

2. The Truth About the All-Caps Name:

Have you ever wondered why your name appears in **all caps** on bills, licenses, and official documents? It's because this all-caps name represents a **corporate entity**, not a living soul. This corporate fiction is what banks and governments file UCC liens against—ensuring they can seize assets if debts go unpaid. **Understanding this distinction** is the first step to reclaiming your financial sovereignty.

3. The Choice Is Yours:

If you're the **borrower**, it's vital to fully understand the consequences of a Security Agreement. Accepting a loan without the means or intention to repay puts your **personal assets at risk**. The simplest way to avoid this? **Stop playing their game**. Don't take out credit cards, loans, or mortgages if you're not certain you can repay them. This isn't just advice for Secured Creditors—it's a rule anyone can apply to **escape the trap of perpetual debt**.

4. Reversing the Game as a Secured Creditor:

As a Secured Creditor, you have access to **powerful alternatives** for managing debt—options that go beyond using **Federal Reserve Notes** (FRNs). It all starts with your **golden signature**. Here's how:

- **Discharging Debt:** You can legally **discharge debts** or cancel them using specific processes that leverage your signature as a form of credit.
- **Promissory Notes:** By creating a **promissory note** and securitizing it, you can leverage your **Treasury Direct Account (TDA)** to settle obligations without using cash from your personal bank account. This process allows your TDA to be credited twice from that note—essentially canceling the debt.

This is what the financial elites have known for generations—the ability to create **credit out of debt** and manage financial obligations without depleting personal resources.

5. The Path Forward: Assembling Your Secured Creditor Package:

Before diving into advanced methods like **promissory notes** and TDA accounts, it's crucial to **establish your foundation**. This means putting together your **Secured Creditor package**:

- **Filing the UCC-1** to reclaim your rights.
- Drafting a **Security Agreement** to protect your assets.
- Creating your **Foreign Trust** to hold those assets securely.

This comprehensive approach not only safeguards your wealth but also positions you to **discharge debts** effectively. It's about reclaiming control—**legally and powerfully**.

6. Moving Beyond the Illusion:

The financial system was designed to **keep you in perpetual debt**. The only way out is to stop playing by their rules and start operating on the **private side**—where true freedom exists. The process of becoming a **Secured Creditor** is about more than eliminating debt; it's about **reclaiming your sovereignty** and stepping into your rightful power as a living, breathing soul—**not a corporate fiction**.

So, if you're ready to **break free** from the financial plantation and take control of your estate, the journey begins with understanding and assembling your **Secured Creditor package**. This is the foundation that leads to **true financial independence** and the power to live life on your own terms.

Are you ready to reclaim your sovereignty?  

What is Collateral?

The True Nature of Collateral and the Birth Certificate Explained

1. Understanding Collateral:

Collateral encompasses **everything you believe you own**—but in reality, these assets are registered under the **debtor's name**, which is the **all-caps name** on your birth certificate. This **all-caps name** represents the **government franchise name**—an artificial, corporate entity separate from your living self.

2. The Birth Certificate: A Corporate Instrument:

Your **birth certificate** is far more than a simple record of your birth. It is a **negotiable instrument**, a registered security, and a **stock certificate** representing the preferred stock of the corporation that is your franchise name. This document **certifies the date, time, and place of your birth**, along with your parentage, but serves a more profound purpose:

- It functions as a **pedigree chattel document**, confirming the existence of the **government franchise name**—an artificial person with a **fictitious corporate identity**.
- It acts as a **document of title** to this franchise name, akin to a **warehouse receipt for your body**.
- This is why it lacks personal details such as **hair color, eye color, weight, or fingerprints**—because it is not a document about you, the living being, but about the **corporate entity** created in your name.

3. The Corporate Creation:

The issuance of the birth certificate effectively transformed your **franchise name** into a **corporation**—a financial instrument that the elite **monetize for their own benefit**. In essence, your birth certificate is part of a **vast financial system** where the government and financial institutions leverage your corporate entity to **generate revenue**.

This explains why documents like **driver's licenses** also bear the all-caps name and exclude personal identifiers such as hair color, height, or weight—they are not about the **living man or woman** but the **corporate fiction** that was created.

4. A Deeper Insight: The Industrial Bond:

Your birth certificate also acts as an **industrial bond**—a form of a **delivery receipt**—creating a contractual link between you, the **flesh-and-blood individual**, and the **corporate U.S. government**. This bond essentially positions your body as the **surety** for the debts and obligations of the **government franchise name**.

In other words, the birth certificate represents a **contractual agreement** between the living person and the industrial society—an agreement most people enter into **unwittingly**. This is why understanding the true nature of your birth certificate is **crucial for reclaiming your sovereignty**.

5. Seeing Through the Illusion:

Once you grasp this, it becomes clear that the financial and legal systems are designed to **benefit the elites** by leveraging the corporate entities created through birth certificates. This knowledge is the first step toward **unraveling the deception** and reclaiming control over your assets and identity.

The ability to see through this illusion is akin to having a moment of **clarity**—realizing that the system was never designed to serve you, but to **exploit the corporate franchise** created in your name.

6. The Path Forward:

To move beyond this system, one must become a **Secured Creditor**—someone who reclaims control over the **corporate entity** through strategic use of the **UCC, Security Agreements, and a Foreign Trust**. This is how you **transform collateral** into an instrument of freedom rather than bondage.

Understanding this is not just about financial independence—it's about **sovereignty, autonomy**, and stepping out of a system designed to keep you **enslaved through deception**.

Are you ready to take back control of your estate and truly understand the power behind the **birth certificate and collateral**? 🗝️🌟

Where does registration come from?

The Truth About Registration: What You're Really Signing Away

1. The Power of Registration:

The term “**register**” originates from the Latin words **Rex** or **Regus**, meaning **king** or **ruler**—and this is no coincidence. When you **register** your property—whether it’s your car, children, or a corporation—you are **transferring legal title** to the state or the Crown. In essence, you are surrendering **full ownership** and retaining only **equitable title**—the mere right to **use** the property, not truly **own** it.

2. Legal Title vs. Equitable Title:

Upon registration, the **legal title** is transferred to the **government corporation**, while you are left with **equitable title**—the right to use the property for a fee. This fee manifests as **use taxes**: income tax, sales tax,

property tax, etc. Unlike **lawful taxes** such as excise or impost taxes, these use taxes apply solely because you no longer hold the legal title.

To conceal this transfer of ownership, the state places your registered property under an **all-caps name**—a corporate fiction that resembles your own name. This subtle deception prevents most people from realizing they have **forfeited true ownership**.

3. The Government Franchise Name:

The **all-caps name** on your birth certificate represents a **government franchise** owned by the state. This is why anything registered under that name—**your car, your home, even your children**—is subject to state control. By retaining **legal title**, the government reserves the right to impose regulations, mandates, and taxes on your use of these assets.

If you instead **record your legal title** to property without registering it, you maintain full **ownership rights** and protect yourself from these encumbrances. Understanding this distinction is crucial for reclaiming your sovereignty and safeguarding your assets.

4. The Reality of Acquiescence:

When you register your property, you **voluntarily acquiesce** to the state's authority. This is why the government can dictate:

- **What you do with your property.**
- **What medical procedures your children must undergo.**
- **What taxes and fees you must pay.**

By signing these agreements without understanding their implications, you inadvertently **consent to state control**. However, **knowledge is power**—and recognizing this deception is the first step towards reclaiming your **freedom and ownership**.

5. The Birth Certificate and Corporate Fiction:

The creation of the **government franchise name** begins with the **birth certificate**—a document that transforms your identity into a **corporate fiction**. This certificate is sold to the **Commerce Department** of the corporate governments (e.g., **USA INC, UK INC, Canada INC, Mexico INC**). Each certificate is converted into a **negotiable instrument**—a bond against which the government generates **revenue**.

These so-called countries are, in reality, **corporate entities** owned by the **Crown and the Vatican**. The birth certificate serves as a **warehouse receipt** for the corporate fiction, not for the **living man or woman**. This system is a deliberate mechanism to monetize human capital without the consent or awareness of the individual.

6. The Role of the BAR Association:

The **BAR Association**—which stands for **British Accreditation Registry**—acts as an intermediary between the government's corporate

fiction and the living person. It operates **under the Crown** and is responsible for managing contracts between you (as the **fiction**) and the state. This is why legal proceedings use the all-caps name and why attorneys, as officers of the court, are **beholden to the Crown** rather than the individual they represent.

7. The Hidden Agenda: Monetization of Your Name:

By converting your birth certificate into a **negotiable instrument**, the state gains the ability to **monetize your franchise name**. This allows them to move funds between **private investors** and generate **profit without your knowledge or consent**. The corporate fiction created in your name serves as the **foundation for debt, taxes, and legal obligations** imposed upon you.

8. Breaking Free from the Illusion:

To escape this **corporate control**, it's essential to understand the distinction between the **all-caps corporate entity** and the **living individual**. Reclaiming your **legal title** and operating on the **private side** as a **Secured Creditor** allows you to:

- **Eliminate unlawful taxes and fees.**
- **Protect your assets from seizure.**
- **Exercise true ownership rights** without state interference.

This knowledge exposes the true nature of the **financial and legal systems**—not to control you but to empower you to take back your sovereignty.

Are you ready to reclaim what is rightfully yours and step out of the corporate matrix?  

We are Nonadverse! Peaceful!

The Strategic Approach of a Secured Creditor: Cooperation, Not Opposition

As a **Secured Creditor**, we do not position ourselves as adversaries to the establishment. Quite the opposite—instead of opposing their authority, we adopt a strategic approach: **we fulfill their demands while securing our own interests**. It's a principle of mutual benefit—**“You scratch my back, I'll scratch yours.”**

Let's be clear: those who control the system are **immensely powerful** and possess knowledge far beyond what most can comprehend. They are not just **masters of finance and law** but are also well-versed in **esoteric knowledge, the afterlife, extraterrestrial technologies, and**

even time travel. Their understanding and foresight place them **miles ahead** of the general population.

They've always known that **only a select few** would successfully navigate their way **off the plantation**—and they've ensured that those who do must do so **correctly and lawfully**. The system, as it stands, is a **masterpiece of strategic design**—perfectly orchestrated to maintain control while allowing a path to freedom for those wise enough to discover it.

Embrace the System, Don't Fight It:

Attempting to **overthrow or confront** such a well-crafted system is not only futile but counterproductive. The reality is, you cannot outmaneuver a structure built on **centuries of strategic planning and advanced knowledge**. Instead, the true power lies in **making peace with the system**—understanding its mechanisms and leveraging them to your advantage.

In fact, the very powers that appear to restrict you can become your **greatest allies**—if you demonstrate that you are a **creditor, not a debtor**. By showing that you can responsibly manage your affairs, **discharge obligations lawfully**, and operate with integrity, you align yourself with the system's own principles.

The Role of the Secured Creditor:

As Secured Creditors, our approach is simple yet profound:

- **We do not evade obligations**—we **discharge** them efficiently using our **Foreign Trust** and the power of our signature.
- **We manage our affairs responsibly**, presenting ourselves as **competent and trustworthy** in the eyes of the system.
- **We do not oppose** the establishment; we work **within its framework** to achieve true sovereignty and financial freedom.

This strategy transforms the establishment from an adversary into an **ally**—one that recognizes your authority and respects your ability to **navigate the private side** of the system.

A Masterstroke of Strategy:

By embracing this path, you effectively step **out of the debtor's role** and into the position of a **creditor**—someone who holds the power to settle debts, manage obligations, and command respect within the financial system. This is not about **rebellion or resistance**—it's about understanding the **rules of the game** and playing them better than most.

So, instead of wasting energy fighting the establishment, we focus on mastering its rules—**using our knowledge, our trust, and our signatures** to discharge debts and reclaim our sovereignty effortlessly. This is the true essence of being a **Secured Creditor**: strategic cooperation, lawful discharge of obligations, and the **restoration of your true power and freedom**.

Are you ready to stop fighting the system and start **mastering it**? 🗝️✨

Geneva Conventions

The Geneva Conventions: A Framework for Humanitarian Law and Civilian Protection

The **Geneva Conventions** comprise **four treaties** and **three protocols** that establish the standards of **international law** for the **humanitarian treatment of war victims**. When referred to in the singular, the term “**Geneva Convention**” typically denotes the **agreements of 1949**, which were negotiated in the aftermath of **World War II (1939–1945)**. These agreements updated the terms of the **1929 treaties** and introduced two additional conventions, significantly expanding protections for **prisoners of war, civilians, and military personnel**.

The **1949 treaties** were ratified either fully or with certain reservations by **196 countries**, making them one of the most universally accepted sets of international laws. These conventions established essential protections for the **wounded and sick**, as well as for civilians within and around **war zones**. However, it is crucial to note that the **Geneva Conventions** explicitly deny these rights and protections to **non-combatants** who do not adhere to the conventions' criteria.

The Scope and Limitations of the Geneva Conventions:

The articles of the Geneva Conventions do not govern the conduct of **warfare itself** or the use of **weapons of war**—these issues are addressed by the **Hague Conventions** of **1899** and **1907**, as well as the **1925 Geneva Protocol** for the prohibition of **asphyxiating, poisonous gases and bacteriological methods of warfare**.

In essence, the **Hague Conventions** focus on the **rules of engagement** and the limitations on the means of warfare, while the **Geneva Conventions** focus on the **treatment of individuals** during conflict. Understanding this distinction is crucial for those seeking to operate **lawfully and strategically** within these frameworks.

The Civilian Strategy: Waving the White Flag:

Our approach aligns with the **principles of the Geneva Conventions** by adopting the status of **civilians waving the white flag**—indicating **non-combatant** and **non-belligerent** status. This strategy effectively removes

the label of “**enemy of the state**” and places us above the conflicts of the corporate war system.

However, it is not enough to merely declare oneself as **non-adverse or non-belligerent**. The language used must be **precise and powerful**, incorporating specific **UCC (Uniform Commercial Code)** terminology that resonates with **accounting and legal standards**—not the simplistic and often misunderstood term “**sovereign**”.

Incorporating the Geneva and Hague Conventions into the UCC:

We leverage the power of the **Geneva and Hague Conventions** strategically within the **UCC-1 filings**—but there is a specific methodology to this process. It is not about making vague claims of sovereignty; it is about incorporating **highly specialized legal language** that renders the filing **unassailable**.

For example, the **Secured Creditor Program** demonstrates how to draft a **Security Agreement** that effectively **overrides existing UCC liens** held by **corporations or foreign agents** against individuals. This agreement is meticulously constructed to ensure that, under international law, we are recognized as **non-combatant civilians** who have lawfully reclaimed their status and rights.

Protection Under the White Flag:

By adopting this approach, we are effectively protected under the symbolism of the **white flag**—signaling that we are **not at war** with the system but are operating **above it**. This status requires the state and its agents to recognize our **non-belligerent civilian position** and to **cease hostilities**.

The true power of this strategy lies in its ability to **neutralize the adversarial nature** of the state's claims, transforming us from **combatants into creditors** who lawfully manage their affairs through **discharge and settlement of obligations**—not through conflict or resistance.

Mastering the System, Not Fighting It:

In essence, this approach transforms the way we interact with the establishment:

- We do not oppose or confront the system.
- We leverage **international law** and **UCC protocols** to assert our **rights and status**.
- We **discharge obligations lawfully** through the strategic use of **Foreign Trusts and signatures**.

This strategic positioning not only ensures our **protection** but also compels the system to **recognize and respect our status** as lawful, non-combatant civilians operating on the **private side**.

In this way, we move beyond the limitations imposed by the corporate system and reclaim our true power—**lawfully, strategically, and without opposition**.

Are you ready to step out of the battlefield and into a position of true **sovereignty and security**? 🗝️ ✨

Enemy of the State

The Power of Foreign Trusts: Legal Protection Beyond Borders

For entertainment purposes only.

1. The Uninterrupted State of Emergency:

Since **March 9th, 1933**, the United States has been in a **continuous state of declared national emergency**. Under the powers delegated by these emergency statutes, the **President** has extensive authority to:

- **Seize property.**
- **Control production and commodities.**
- **Assign military forces abroad.**

- **Institute martial law.**
- **Regulate private enterprises and control transportation and communication.**
- **Restrict travel and impose comprehensive control** over American citizens.

This state of emergency has persisted **uninterrupted** for nearly **nine decades**, largely unnoticed by the general public (*Senate Report 93-549*).

In **1933**, the federal United States **hypothecated** all **present and future properties, assets, and labor** of its citizens (as defined under the **14th Amendment**) to the **Federal Reserve System**—an act that transformed American citizens into **collateral for the national debt**.

2. The Strategic Power of Foreign Trusts:

In this context, a **properly structured Foreign Trust** represents the most **powerful legal shield** available today. By transferring assets into a **Foreign Trust**, individuals can achieve:

- **Ironclad asset protection.**
- **Tax immunity.**

- **Complete control over assets** while removing liabilities and encumbrances.

Assets held in a Foreign Trust cannot be **seized, liened, or levied** to satisfy the debts of the beneficiaries or trustees. This strategic protection has been utilized for **centuries by the world's elite**—including the **Rockefellers, Rothschilds, and billionaires worldwide**—to safeguard wealth and preserve power.

3. Why Foreign Trusts Are Unassailable:

A Foreign Trust established **outside of the United States** is protected by the **jurisdictional limitations** of domestic courts.

- Even if a **notice of lien, lawsuit, or judgment** is issued domestically, assets in a Foreign Trust remain **untouchable**.
- A **domestic judge** would be required to **physically travel** to the foreign jurisdiction to challenge the trust—a legal impossibility due to jurisdictional restrictions.

This is the essence of why a Foreign Trust is impervious to domestic legal actions—it is beyond the reach of **U.S. courts** and their jurisdiction.

4. The Distinction Between Foreign and Domestic Trusts:

There are **two primary types of trusts**:

1. **Foreign Trust:**

- Includes a **foreign tax identifier (EIN)**—a special designation that grants unparalleled protection.
- Is **irrevocable** and **foreign** in nature, making it impervious to domestic courts.
- Is established **outside of the United States** or any individual's home country, rendering it immune to domestic claims.

2. **Domestic Trust:**

- Requires **registration** within the United States, making it **taxable** and easily subject to **legal action**.
- Courts can easily **pierce the corporate veil**, seize assets, and even change **beneficiary designations** if the trust is domestic.
- Is vulnerable to the whims of state regulations and judicial orders, particularly in states like **Nevada**, where registration is mandatory.

5. **The Problem with Domestic Trusts:**

Domestic Pure Organization Trusts (508 Trusts) are often perceived as secure, but in reality, they are:

- **Easily pierced** by domestic courts.

- Subject to **taxation and regulatory oversight**.
- Liable to have **beneficiaries replaced by creditors** in the event of legal action.

Many individuals have faced **bank account closures** and asset seizures simply because their domestic trusts are **registered with the state**, making them **easy targets** for creditors and the IRS.

6. The Hidden Truth Behind Registration:

To **register** something is to **transfer legal ownership** to the state, retaining only **equitable title**—the right to use the property without true ownership. This is why domestic trusts, which must be **registered**, are so easily compromised.

In contrast, a **Foreign Trust** does not require registration within the United States. Even in states like **Nevada**, where trust registration is mandated for domestic entities, a **Foreign Trust** is exempt, allowing for far greater flexibility and security.

7. The Reality of Sovereignty and Ownership:

Many are led to believe they own their **homes, cars, businesses, and assets**—but in reality, these are held under the **all-caps corporate name**

linked to the **birth certificate**. This name represents a **government franchise** used to generate revenue through taxes, fines, and fees.

The **true elites**, such as the **Rockefellers**, operate under the principle of **“control everything, own nothing”**. By placing their assets into **Foreign Trusts**, they retain full control without legal ownership, ensuring their wealth is protected from **seizure and taxation**.

This strategy exposes the truth: true **sovereignty** is not about claiming to be “sovereign” in words, but about operating through **foreign entities and trusts** that are immune to domestic jurisdiction.

8. The Indigenous Perspective vs. Corporate Ownership:

Historically, the **indigenous people** of America—referred to as the **caretakers of the land**—did not believe in the **ownership** of land or property. In stark contrast, the current corporate system has convinced the population that **ownership equates to freedom**, while secretly maintaining true ownership through **registrations and legal fictions**.

9. A Paradigm Shift in Understanding:

To truly **reclaim your assets** and operate outside of the corporate plantation, one must:

- Establish a **Foreign Trust** with a foreign EIN.

- Transfer all assets to this trust, thereby removing them from the reach of domestic courts.
- Understand the distinction between **legal title** and **equitable title**—and ensure that you hold the former through strategic trust arrangements.

By mastering these principles, you step into the realm of the **true elites**—those who understand how to leverage the system rather than be constrained by it.

10. The Path Forward:

It's not about **rebellious against the system** but about **mastering it**. The knowledge of **foreign trusts and proper asset structuring** is the key to financial sovereignty and ultimate protection against a system designed to **extract wealth** through deception and legal fictions.

Are you ready to protect your assets like the elites do—legally, strategically, and beyond the reach of domestic courts? 🗝️🌟

The Foreign Silver Bullet Trust

The Proper Establishment of a Foreign Trust for U.S. Persons

1. Becoming a Secured Creditor: The Essential First Step

To establish a Foreign Trust effectively, the first step is to become a **Secured Creditor**—this is the only appropriate way to proceed if you are classified as a **U.S. Person**. Both **U.S. persons and foreign nationals** can utilize the **franchise name** on their **birth certificate** as the trust name and **foreign grantor**. However, it is crucial to note that this name should not include corporate designations such as **Incorporated, LLC, Corp, or Limited**, as doing so would transform the trust into a corporate entity—defeating the purpose of a Foreign Trust.

Instead, simply append the word “**Trust**” after the all-caps name on your birth certificate. In doing so, you are effectively **recreating your own trust** under your name, separate from any corporate framework. It is also permissible to create **multiple trusts**, but the initial focus should be on establishing a trust under your name to facilitate your exit from the **corporate plantation system**.

2. The Role of the Trustee: Ensuring Irrevocability and Security

The **trustee** of your Foreign Trust should ideally be someone you **trust implicitly**—this individual may be either **related or unrelated** to you. The trustee’s role is to **manage** the trust’s assets, not to **own** them. A properly appointed trustee ensures that the trust remains **irrevocable**, preventing courts from seizing or draining the trust’s assets. You have the power to fire or hire a trustee anytime.

If you do not have a Trustee, then you can be the Trustee and Grantor at the same time.

To maximize protection, it is advisable to appoint **successor trustees**—preferably individuals **from foreign jurisdictions**—to further insulate the trust from **domestic courts**. This is a strategy long utilized by the **elite** to reinforce the integrity and invulnerability of their trusts.

3. Beneficiaries: Who Can Benefit from the Trust?

The **beneficiaries** of the Foreign Trust can include:

- **Family members.**
- **Close friends.**
- **Your own companies.**
- **Yourself**, as the grantor and beneficiary.

By structuring the trust this way, you ensure that the **assets are managed responsibly** and **distributed according to your wishes**—all while maintaining **ironclad protection** from creditors and legal claims.

4. Why Foreign Trusts Surpass Domestic Trusts:

Unlike **domestic trusts**, which are subject to **taxation, registration requirements, and potential court intervention**, a Foreign Trust is:

- **Immune to domestic regulations and statutes.**
 - **Not subject to U.S. court jurisdiction**—domestic courts **cannot pierce the veil** of a Foreign Trust.
 - **Protected under American and English common law**—ensuring privacy and security.
-

What is a 98 EIN?

A **98 EIN** is an **Employer Identification Number** issued by the IRS that begins with the prefix “**98**” and is **specifically assigned to foreign entities**. This prefix distinguishes it from domestic EINs, which typically start with different number sequences.

In short: A **98 EIN** signals to the IRS that the entity is **foreign**—not domestic—even if the responsible party (grantor or trustee) is a U.S. person.

How Does It Relate to a Foreign Grantor Trust Indenture?

A **Foreign Grantor Trust Indenture** is a private contractual document that creates a trust where:

- The **grantor** is typically a U.S. person.
- The **trust** is structured to be a *foreign entity* under IRS definitions.

- The **trustee** is usually a non-U.S. person or entity, or the trust has substantial activities or administration outside the U.S., meeting the “foreign” test under 26 CFR §301.7701-7.

To operate properly within the IRS framework, the trust must obtain an EIN that reflects its status.

Why Use a 98 EIN for a Foreign Grantor Trust?

1. IRS Classification

A Foreign Grantor Trust must use a **foreign EIN** to reflect its status under U.S. tax law. Using a regular (domestic) EIN could misclassify the trust as domestic, potentially exposing it to U.S. jurisdiction, taxation, and reporting obligations.

2. Asset Protection & Jurisdictional Shield

When structured correctly, the 98 EIN supports the legal argument that the trust—and its assets—exist outside the

jurisdiction of U.S. courts and creditors. This is one of the key protective benefits of a Foreign Grantor Trust.

Important Note

While obtaining a 98 EIN is a critical step, **it must align with the trust's full structure**—including:

- The wording in the Trust Indenture,
- The residency and role of the trustee,
- The location of trust administration,
- And the proper filing of IRS forms.

Simply getting a 98 EIN without aligning these other elements can result in IRS scrutiny, loss of protection, or legal consequences.

Once you receive your **Foreign EIN** from the **IRS**, either you or your trustee can open a **trust bank account**. This step formalizes the trust's status and ensures its **irrevocability**. It is essential to remember that **you do not own the assets in the trust**—the trust itself is the owner, safeguarding your wealth from potential legal actions.

5. The Strategic Importance of Foreign Addresses:

For a Foreign Trust to retain its immunity, it must be associated with a **foreign address**. This address:

- Prevents domestic courts from claiming jurisdiction.
- Ensures that any correspondence from the **IRS** is directed to the foreign address, further insulating the trust.

The choice of foreign jurisdiction depends on **strategic considerations**:

- For highly regulated countries like **Canada**, using an address **outside of Canada** is advisable.
- For countries with **less stringent regulations**, such as **Mexico**, using a local address may suffice.

This flexibility allows you to leverage **international protections** while retaining full control over your assets.

6. Dispelling Misconceptions: The Issue with Domestic Trusts:

Domestic trusts, including the so-called “**Pure Organization Trusts**” (**508 Trusts**), are often perceived as secure but are, in reality, highly **vulnerable**:

- They are subject to **domestic taxation**.
- Courts can **easily pierce their corporate veil** and seize assets.
- **Beneficiaries can be replaced by creditors** during legal proceedings.

In contrast, a Foreign Trust requires **no exchange of money or funds** to establish—eliminating a key vulnerability present in domestic trusts. This makes the Foreign Trust **superior in every aspect** of asset protection.

7. The Importance of Proper Documentation:

Securing a **Foreign EIN letter** from the IRS is only the beginning. You must also possess:

- **Formal trust indenture**.
- **A properly executed trust agreement** with notary signatures.
- **Title pages** that outline the trust’s structure and legal standing.

Banks may request to **view the trust documents** to verify the type of trust you have established. While they cannot legally demand to see the

entire trust—as this would violate its protected status—they may inspect specific pages to confirm its authenticity and compliance. This step is essential to prevent the **revocation of your trust's status** and to ensure seamless banking operations.

8. Navigating the Banking System: Entering the Beast's Lair

Engaging with the banking system requires a clear understanding of its **operational dynamics**. Banks are not merely financial institutions—they are extensions of the **corporate system** that profits from the unwary. When you enter a bank, regardless of how welcoming it appears, you are stepping into the **belly of the beast**.

To navigate this environment successfully:

- **Present your trust documents strategically**—revealing only what is legally required.
- Maintain a stance of **professional detachment**—recognizing that bankers are trained to exploit any weaknesses in your paperwork.
- Assert your **status as the Trustee and Executor of The Trust**—reinforcing your legal standing without unnecessary confrontation.

9. Mastering the System, Not Opposing It:

The ultimate goal is not to **fight the system** but to **master it**—using its own rules to secure your assets and protect your legacy. By establishing a **Foreign Trust** with a **Foreign EIN** and a **proper trustee structure**, you:

- Shield your assets from **seizure, liens, and levies**.
- Ensure that your wealth passes seamlessly to your beneficiaries.
- Operate outside the jurisdiction of domestic courts, free from the risk of judicial overreach.

This is the essence of **true sovereignty**—controlling everything while legally owning nothing.

Are you ready to move beyond the plantation system and secure your wealth with an ironclad Foreign Trust? 🗝️ ✨

LETS GET MORE INDEPTH ON WHAT A FOREIGN GRANTOR TRUST IS

A foreign grantor trust is created by those who understand the distinction between being a **U.S. PERSON**, a **14th Amendment Citizen**, and an **American Indigenous individual**—a sentient sovereign being born on the land.

In 1871, the U.S. Constitution was ratified to align with the **U.S. CORPORATION**, rather than the **Organic Constitution**, which was originally established to protect the sovereign people of the United States of America as a nation, not as a corporate entity. This shift effectively replaced the original 13th Amendment—which abolished all forms of slavery—with the 14th Amendment, redefining citizenship as *U.S. Citizen* status.

Careful examination of the Constitution reveals references to the “American people,” but this changes with the introduction of the 14th Amendment and subsequent amendments. This shift was a means of controlling the American people and stripping them of their wealth—most notably in 1933, when **President Franklin Delano Roosevelt issued an Executive Order seizing gold and silver from the public.**

Prior to these changes, the United States was a **sovereign nation**, and *We the People* enjoyed numerous benefits and privileges. The sovereign people of that time were the **American Indigenous**, those born on the land—also known today as **Secured Creditors and Diplomats.**

They held the same power as kings and queens, protected by the **Organic U.S. Constitution**, a protection that still exists to this day.”

According to *Black’s Law Dictionary* (7th Edition), the term “**Person**” is legally defined as a **corporation or a dead entity**. This legal interpretation has been instrumental in transforming American sentient beings into **corporate entities**, allowing the government to create contracts and enforce **color of law** statutes upon the people. The term “**U.S. Person**” is particularly revealing. A **U.S. Person** is legally defined as a **federal employee of USA Inc.**, thereby making them subject to federal tax laws. Notably, the **Organic Constitution**—the original foundational document of the United States—makes no mention of federal income taxes or even Federal Reserve Notes.

Federal Reserve Notes, often mistaken as legitimate currency, are in reality **IOU notes**. This means that when a person purchases goods—such as a loaf of bread—the note itself does not settle the transaction. Instead, the actual payment is made when a laborer working under this financial system redeems that note through their labor. Under the Organic Constitution, **gold and silver were the only recognized legal tender**—

not Federal Reserve Notes. In fact, Federal Reserve Notes are legally classified as **foreign money**, bearing no direct legal connection to the **United States of America as a sovereign entity**.

Historically, the U.S. Treasury served as the primary financial institution for the people, and maintaining a direct relationship with the Treasury was a fundamental part of the nation's financial system. These Treasury-based transactions were the foundation of commerce, ensuring that the people had direct access to their wealth in gold and silver rather than relying on fiat currency.

Many Americans remain unaware of the fundamental changes that reshaped their nation, largely due to the lack of education surrounding these historical events. The pivotal shift occurred in **1871**, when the **U.S. Constitution was ratified to align with the corporate structure of the United States**, altering the nation's governance. A further blow to economic sovereignty came under **President Franklin Delano Roosevelt**, who issued **House Joint Resolution (HJR) 192**—an executive order that effectively **confiscated gold and silver from American citizens**. In exchange, individuals were given **Federal**

Reserve Notes, a fiat currency with no intrinsic value. Compliance was **not optional**; those who refused to surrender their gold faced severe penalties, including a **\$10,000 fine or up to 10 years of imprisonment**.

These legislative actions drastically altered the financial and legal landscape of the United States, stripping Americans of their constitutional right to own **gold and silver**, the only legal tender recognized under the **Organic Constitution**.

The **Organic U.S. Constitution** remains in effect, but its power is understood and utilized by only a select few. These individuals are known as **Secured Creditors** and **American Indigenous people of the land**, also recognized as **Diplomats**. As **Secured Creditors and Diplomats**, we possess significant legal and financial power, safeguarded by the **Organic U.S. Constitution**—a document that continues to protect those who operate within its jurisdiction. Unlike **U.S. Persons** or **federal employees of the U.S. Corporation**, we do not voluntarily submit to a system designed to impose corporate status upon the people.

However, many unknowingly reinforce this corporate

identity by marking “U.S. Person” on official documents—such as voter registration forms, employment applications, and other government paperwork. Each time this box is checked, it further entangles the individual within the corporate structure, effectively waiving their sovereign rights.

Secured Creditors understand this distinction and take deliberate steps to avoid such classifications. Instead of identifying as “U.S. Persons,” they properly assert their status as **American Indigenous individuals**. This process involves formally notifying the **IRS** and the **U.S. Treasury in Puerto Rico** that they do not fall under the legal definition of a U.S. Person and fully understand the implications of this distinction. By taking these steps, Secured Creditors reclaim their sovereignty and ensure they are operating within the protections of the **Organic Constitution** rather than under corporate law.

Those who understand the distinction between being a **U.S. Person** and a **true American Diplomat**—one who operates on the **private side**—take strategic steps to protect their legal and financial standing. One of the most powerful tools in this process is the **Foreign**

Grantor Trust, which ensures that an individual is not classified as a **U.S. Person** and, therefore, is not subject to the same tax obligations. This separation is achieved through the **proper execution of legal documentation**, which differentiates the **living individual** from the **corporate entity**—a construct derived from the **Birth Certificate Bond**. At birth, the government assigns a legal name to a newly born individual and converts that name into a **corporate entity**, allowing them to engage in contracts with that entity for the purposes of taxation, regulation, and enforcement of statutory laws.

However, these legal and financial controls apply **only to those who are enrolled in the system**—a process that occurs unknowingly. Individuals are not inherently bound to this system; rather, they are **voluntarily** placed under its jurisdiction through the **use of their birth certificate, Social Security number, and other government-issued identifiers**.

This system operates by extracting **energy and economic value** from the individual, turning them into **a financial asset for the state**, all without their explicit awareness.

By properly establishing a **Foreign Grantor Trust** and legally distinguishing their **living status** from the **corporate fiction** imposed upon them, individuals can reclaim their sovereignty, avoid unjust taxation, and operate outside the confines of the corporate framework. The **Foreign Grantor Trust** is an **irrevocable trust** that provides **bulletproof legal protection** for those who operate as **Diplomats** on the private side. By properly filing the necessary documentation with the **IRS**, an individual can establish their status as a **Foreign Grantor of the Trust**, thereby freeing themselves from the burdens of taxation. To ensure the integrity and effectiveness of the trust, it is advisable to appoint a **Trustee** who will oversee its management. It is crucial that the **Grantor**—as a **sentient being**—does not personally claim ownership of any assets. Instead, all assets must be **legally owned by the trust itself**, with the **Trustee serving as its manager**.

This structure creates a **legal shield**, ensuring that authorities cannot hold the Grantor personally liable for any claims or obligations. In many ways, this operates similarly to a **corporation**, where **corporate liability does not extend to the individual behind the entity**. Just as

corporate protections prevent legal action against the business owner, a properly structured **Foreign Grantor Trust** safeguards the Grantor from legal and financial liabilities.

By understanding and utilizing this powerful legal framework, individuals can operate **outside the jurisdiction of statutory taxation and regulation**, securing their financial sovereignty with an **unassailable layer of legal protection**. The **Trustee** can establish a **checking account** on behalf of the **Foreign Grantor Trust**, ensuring that all financial transactions remain aligned with the trust's legal framework. However, for enhanced privacy and flexibility, an individual may choose to create a **Living Domestic Trust**, serving as both the **Trustee** and **Grantor**.

A **Living Domestic Trust** is a **revocable trust**, allowing for modifications at any time. When structured correctly, it can be assigned to a **designated estate number**, making it significantly easier to open a **checking account** under the trust's name.

To maintain the highest level of privacy and asset protection, the **Foreign Grantor Trust** operates in the **background**, exercising control

over the **Living Domestic Trust**. This setup ensures that while the **Living Domestic Trust** appears to function as a domestic entity, it is, in reality, governed by the **Foreign Grantor Trust**.

For proper compliance and legal recognition, the **IRS** is notified through the appropriate documentation, formally establishing that the **Domestic Trust** is, in fact, a **foreign trust** due to its connection to the **Foreign Grantor Trust**. This strategic structuring provides both flexibility and legal protection, reinforcing financial sovereignty while maintaining compliance with applicable regulations.

By following the **proper procedures** in notifying the **IRS**, we ensure compliance while safeguarding ourselves from potential legal complications. This structured approach allows for the **free deposit of funds** without being classified as a **U.S. Person**, thereby exempting us from taxation under corporate statutes.

As the **Executor** (for a man) or **Executrix** (for a woman), you are exercising your **lawful rights** under the **Organic U.S. Constitution**—rights that grant you the **same level of authority** as the **foreign entities**

that govern the country. The banks, government institutions, and courts operate as **fictional foreign entities** under their **de facto corporate structures**. Understanding this distinction empowers individuals to navigate the system lawfully while maintaining **financial sovereignty and legal independence**.

You can incorporate your **corporations, LLCs, and domestic trusts** into a **Foreign Grantor Trust**, effectively **transforming them into foreign entities** while maintaining **full control**. Contrary to popular belief, there is no need to relocate assets to offshore jurisdictions such as **St. Kitts, Nevis, or the Cayman Islands** to protect wealth.

A **U.S. Person**—one subject to federal taxation—remains liable for reporting income **regardless of where they are in the world**. Simply moving assets offshore does not shield them from the jurisdiction of the **IRS**. However, individuals who establish themselves as **Secured Creditors or American Diplomats** hold a unique advantage. Through proper legal structuring and **correct status correction**, they can **open checking accounts both domestically in the U.S. and internationally in financial hubs such as Switzerland**—while remaining fully tax-

exempt.

This is the **true definition of financial sovereignty**—freedom from unwarranted taxation and interference by a **foreign corporate entity** operating as **USA Inc.** It is essential to recognize that the **United States of America as a sovereign nation** is distinct from the **corporate structure** that governs its citizens under statutory law.

By acquiring and applying this **powerful knowledge**, you can lawfully **protect yourself and your family**, ensuring complete financial security while remaining **impervious to unjust taxation and external control.**

As a woman who has understood the **distinction between the two legal entities** for over fifteen years, I successfully **eliminated child support obligations** through my **Foreign Grantor Trust**. My ex-husband, who had wrongfully taken my children from me years ago due to an affair with my then-close friend, went to great lengths to prevent me from seeing them. Despite his financial stability, he pursued child support payments from me, using the legal system to his advantage.

By leveraging the **Foreign Grantor Trust**, I was able to **legally nullify** these obligations, with the **IRS recognizing my lawful status and protecting my rights throughout the process**. This experience reinforced my commitment to maintaining **financial sovereignty** and living free from unjust taxation.

For years, I have enjoyed a **tax-free existence**, freely traveling to and from the **United States** while maintaining my **passport** without issue. I have not paid a single **dollar in taxes**, as I understand the critical distinction between operating as a **U.S. Person** and asserting my **lawful foreign status**. The only forms I ever filed were those necessary to **correct my legal status**—a one-time process that ensured I would never have to file tax returns annually.

By remaining **legally foreign to their jurisdiction**, I have secured a **peaceful, financially liberated life in Mexico**, free from unnecessary governmental interference. I currently hold a **valid U.S. passport**. This serves as clear evidence of my **good legal standing** and confirms that I have **no criminal record**. I wrote this **concise book** to

educate those seeking **true financial and legal independence** while maintaining a **non-adversarial approach**. It is important to clarify that we are **not affiliated with sovereign citizen groups**, nor do we ever claim to be **sovereign**—a term that has become associated with adversarial movements and can lead to unnecessary scrutiny.

Instead, we operate **lawfully and professionally**, ensuring a **cooperative and respectful relationship** with the **IRS and other foreign entities** while exercising our **legal rights** within the framework of the system.

It is also essential to recognize the larger agenda at play. **Agenda 2030** is being implemented across many nations with the intention of **enslaving humanity** through a **cashless society**, ultimately integrating individuals into a **digital control grid**.

A **trusted friend and retired Navy officer**—now working in **cybersecurity**—has confirmed that these developments are already unfolding. His own colleague has implanted a **microchip in his hand** to access and operate his **Tesla vehicle**, signaling the rapid

advancement of **biometric-based financial systems**.

With companies like **Elon Musk's ventures aligning with Donald Trump's administration**, the push for an **AI-driven society** is accelerating. In the near future, even basic necessities such as **water purchases** may require **smartphone verification or digital implants**.

For **Executors of the Foreign Trust**, however, this shift poses no threat. By operating **on the private side**, we remain **financially and legally independent**, observing these changes from a position of security. Unfortunately, **not everyone will break free from the system**, as many are deeply programmed to defend it—even at their own expense. Such individuals are not ready for this knowledge, nor do they seek it.

This information is reserved for **those with the courage to question, to seek, and to take control of their own future**. The goal is not to run from the system, but to **master it**.

Your future is in your hands—what will you do with it?

If you're ready to take the first step toward becoming the Executor of your Foreign Trust I invite you to reach out to me, **Druanna**. I would be happy to **guide you through the process** and help you achieve **financial sovereignty**.

If you would like that my team provide the service in processing your Silver Bullet Trust Package, please contact me at druanna@wealthexpatcode.com for the price and payment arrangements.

If you like to move forward and get your Foreign Grantor Trust processed along with Video Recordings you can access anytime along with one month of coaching, please contact me at my email address to move forward.

Empower yourself with the knowledge to **break free from the system** and take control of your financial future!

If you wish to contact me for a consultation go here <https://wealthexpatcode.com>
